

flu | Tested dataset: flu

Exploratory coverage; no claim of a demonstrated GC fate mechanism.

A Captured cell states

123,693 cells; cell UMAP

B Captured clone coverage

Cells: 123,693

Cells with a clone: 84,038

Expanded clones: 1,997

Inferred programmes: 4

These are datasets already tested.

They are excluded from the main biological argument and GC-focused supplements.
