

flu_lung | Tested dataset: flu_lung

Exploratory coverage; no claim of a demonstrated GC fate mechanism.

A Captured cell states

4,121 cells; cell UMAP

B Captured clone coverage

Cells: 4,121

Cells with a clone: 2,115

Expanded clones: 114

Inferred programmes: 1

These are datasets already tested.

They are excluded from the main biological argument and GC-focused supplements.
