

stephenson | Tested dataset: stephenson

Exploratory coverage; no claim of a demonstrated GC fate mechanism.

A Captured cell states

5,000 cells; cell UMAP

B Captured clone coverage

Cells: 5,000

Cells with a clone: 5,000

Expanded clones: 83

Inferred programmes: 2

These are datasets already tested.

They are excluded from the main biological argument and GC-focused supplements.
