c
Threadfin (default)
clone2vec (forced to ≥ 2 cells)
Clonotrace (forced to ≥ 2 cells)
Clonotrace, published distance (≥ 2)
Benisse
Mean of the embedding (baseline)
Cluster composition (baseline)
Medoid cell, CoNGA's rule (baseline)
Threadfin, mean profile
Threadfin, no centring
Threadfin, no smoothing
Threadfin, no shrinkage
Threadfin, another seed (control)

Spearman correlation of clone-clone distances between the halves
overlap of the 10 nearest clones (dashed: chance)
clones re-identified as their own best match across halves (dashed: chance)
dataset (mean over splits)
median over datasets
Threadfin on the same halves and clones (median)
