NP–OVA division reporter | GSE287123 | 10,109 GC-sorted cells, 471 profiles

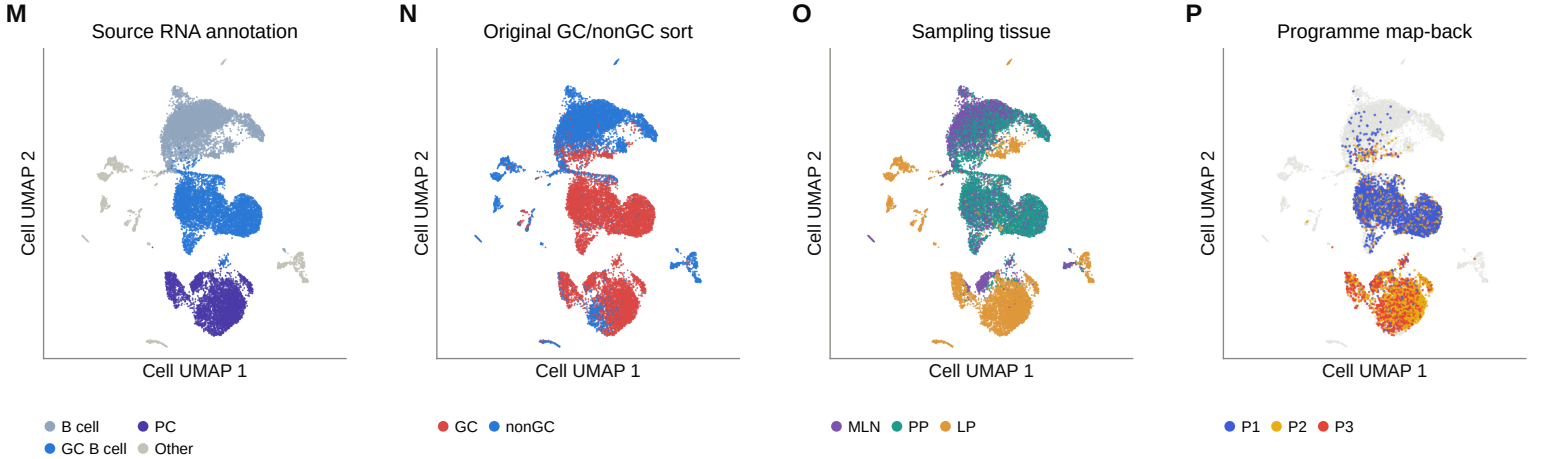

RBD protein / mRNA | GSE287123 | 36,188 GC-sorted cells, 1,887 profiles

Bait and zone labels belong to separate experimental arms; grey cells were not measured for that annotation.

Oral OVA + CT | GSE284622 | 16,619 cells, 958 profiles; core comparison in Figure 3

Division gates: 36 h dilution window. Sort/gate labels are categorical; RNA clusters are descriptive. Grey = missing label or no displayed profile.
