

ebv | Tested dataset: ebv

Exploratory coverage; no claim of a demonstrated GC fate mechanism.

A Captured cell states

205,630 cells; cell UMAP

B Captured clone coverage

Cells: 205,630

Cells with a clone: 123,369

Expanded clones: 6,923

Inferred programmes: 2

These are datasets already tested.

They are excluded from the main biological argument and GC-focused supplements.
